## Logo Symbol + wordmark

The symbol and wordmark are our most iconic representatives. So treat them with care and consistency, and always ensure they are visible by following the clearspace and minimum size rules on this page.

Take context and desired messaging into consideration when choosing parts of the logo suite to represent the

brand. While the wordmark may appear alone as a shorthand for the masterlogo, the symbol should **only** appear in context of the brand name, such as a social media display name.

Master logo	Black and White Logo	Wordmark	Master Symbol	Black and White Symbol
				
				

## Logo Colorways

We keep our logo colorways simple to let the expressiveness in our system shine.

The master logo, wordmark, and symbol can appear in full color or black and white. Use discretion in choosing whichever will have the most contrast in your composition.

## Typography Primary typeface

**NB International Pro** is our primary typeface. It is sans-serif optimized for legibility, with details that complement our system. Cuts in its letterforms mimic the corners and angles of our workmode shapes, while the square tops of the lowercase “i” and “j” add structured detail and a more technical feel. Lastly, ascenders and descenders combine straight lines and curves that mirror the silhouettes of our product windows.

Most collateral appears in the Regular weight, with Light weight for large amounts of body copy and Bold for emphasis.

**For everyday items like emails and PPTs we use Arial.**
